Could probably be fun as a board game with friends. By yourself. Zero enjoyment. There isn't a single feature in this game that hundreds of games don't do better.. I really enjoyed this VR storytelling experience. Can't say too much as to not give away any part of the story, but definitely give this a try. You won't be disappointed!. This game was a bit of a mixed bag for me: I'm not sure I'd say it's a good game, but I definitely enjoyed playing it. The campy horror aesthetic and variety of settings made for an enjoyable experience, even if the story itself is fairly bare-bones. The villain, in particular, I found to be a bit bland, but their voiceover made them an entertaining-enough foe.

Technically, the game is a fine example of a HOG: there's a fair amount of back-and-forth trundling throughout the game, but the addition of fast travel in the game's map made that much more tolerable than it otherwise would have been. Unfortunately, this wasn't the case for the bonus chapter, and I found myself repeatedly going back to the start of the game one room at a time, only to have to return to my last location and repeat the process all over again. That said, the bonus chapter is much shorter (only 8 rooms), and there are no achievements tied to it, so this might not be a problem for you.

All in all, this game definitely has drawbacks, and it could do with a bit more polish. That said, if you're a fan of the genre, or you're just looking for something to spend 2 hours on, you could do worse than Demon Hunter.. Satazius is a side scrolling shmup in the style of Gradius and R-Type. So it has a level design unlike most shmups these days. The weapon system where you have a your primary weapon and two secondary weapons. The secondary weapons you can switch during the game. You shoot both the primary and the secondary weapon at the same time. So you got quite some fire power. But the game is designed around it. You also got a special weapon that you need to charge. And you can collect upgrades for your weapons. The controls are good and there is controller support. The artstyle looks good although it's a bit generic. One thing I didn't like is that the game has a very low resolution. But you can play it full screen or windowed. The music also doesn't do it for me. But if you are looking for a shmup Satazius is a great pick.. Alea Jacta Est is an absolutely wonderful game. Focusing on any Roman time period of significant importance from the times of the dictator "Sulla" to Julius Caesars glorious rise to power, and even the war of control by his heir Octavian. I won't lie, like many AGEODS titles this game requires patience to learn, but the tooltips soon become your friends and you are playing without a doubt the most detailed game focusing on the period. Nothing is left out, even Senators of the time can often be spotted commanding entire legions. I try a Sulla Campaign here, I hope it gives you an idea of what to expect. Ave and good luck!

Doesnt work for Rift Users, dont fall for it , do not buy it on Steam Store, patch still isn't out or fixed it at all :/

[UPDATED]

Since the games major update for Rift and touch support i have happily been playing!, all works perfectly, can see what the vive users have been saying aha this is an absolute realistic and amazing tool , one of the most engaging experiences on VR Yet!, very keen to see where it heads. :P. This game is terrible.. this game sucks\u2665\u2665\u2665\u2665. indie garbage. Really cheap and fun game... and not all that easy :). I've played every monster hunter since the first. Its not for everbody, but this one is great :). Kennys GF is very Hot. Only 3 tracks from 3rd dmc.

No my favourite cerberus battle's song.

However,I still prefer to replace default soundtrack by this or 4th ost.. A very great text adventure game. It has some very interesting characters and a satisfying enough choice system that makes doing multiple playthroughs actually interesting. If you enjoyed games like Heros Rise or choice of robots u should enjoy this .
